

AIRDA / XARDA

Ruggedized Display Assistant

This rugged 10-inch display is specifically designed for Air Force and Land Force vehicle applications, providing a durable and reliable solution for the most demanding military environments. It features a high-resolution screen with intuitive controls, including 28 backlit buttons and 2 rotary encoders for seamless and efficient operation, even in challenging conditions.

The display supports DVI/VGA video inputs, ensuring broad compatibility with various military systems. Engineered for maximum reliability, it withstands extreme conditions while delivering exceptional visibility and responsive performance.

Ruggedized Display Assistant is ideal for mission-critical Air Force and Land Force operations where durability, precision, and functionality are essential.
