

LMUPS-80-24V Ruggedized Uninterruptible Power Supply

Description:

Input: 22 - 29 V DC

Output: 24 V DC, 15 A

The LMUPS-80 Series is a high efficiency, DC power supply and battery charger that brings sophisticated features into a ruggedized design. The LMUPS-80 allows the battery charge to be regulated independently from the DC outputs, meaning that the battery will always receive the optimal charging current without the load being affected. Intelligent 3-stage charging will bring a battery back to a full state of charge much faster than trickle or float charging can. Through the Battery-Parameter software adjustments at the UPS can be done via PC.

OPTOKON NATO supplier code: 1583G

Features:

- 24 V DC UPS device
- Ruggedized design 2.5 RU height box
- Operates as a DC UPS, providing uninterrupted DC power
- Wide-ranging power factor corrected AC/DC input
- Battery hot swap
- Easy battery access - separate battery compartment

Specifications:
